

Advice from our Year 9 Students

Just really take your time and don't rush your decisions, also listen to teachers and parents because their advice is usually right.

Read the booklet

Take a wide variety of options so you have a lot of options if you don't know what you're going to do career wise

Don't choose a subject just because your friends are or just because you like the teacher

Pick a variety of options

It's important to read the booklets and any information on your choices because I ended up changing most of my options I thought I was certain about

Pick things you enjoy and you think are going to be useful in your future education

No choices will be easier than the others, it depends on your skills and interests. There is a high chance you won't end up with your friends when in new classes, so don't choose an option simply because your friend is

Think before you choose

Don't choose a subject you think will be easy, enjoying it is more important

Pick subjects that suit your interests and the way you work and take in information

Make sure you think carefully

Do what you enjoy or what you will need for the future
